

Xiwei Wang

Ontario, Canada | wangxiwei2002@gmail.com | +1 (437) 872-3279 | <https://wxw2002a.github.io/>

Education

University of Waterloo

09/2025 - 12/2026 (Expected)

Master of Engineering in Electrical and Computer Engineering (Software Engineering)

Yanshan University

09/2021 - 06/2025

Bachelor of Electronic Science and Technology, GPA: 86/100

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, Python, C/C++, SQL, HTML/CSS
- **Frontend & Mobile:** React, React Native, Flutter
- **Backend & Cloud:** Spring Boot, Node.js/Express, Django, FastAPI, Azure, Google Cloud, Docker, CI/CD
- **Data & AI:** PostgreSQL, MySQL, MongoDB, Redis, PyTorch, Qwen/Gemini, Stable Diffusion

PROFESSIONAL EXPERIENCE

IPMD, Inc.

05/2026 - 08/2026

Software Engineering Intern

California, United States - Remote

- Engineered an Azure-hosted artwork platform with React/TypeScript, Node.js/Express, Qwen/Gemini and an internal Stable Diffusion 1.5 pipeline, enabling end-to-end AI image creation.
- Containerized four application and model services (React, Node.js, Qwen and Stable Diffusion) with Docker, providing a repeatable deployment process for the Azure-hosted MVP.
- Coordinated six engineering, design and product workstreams and streamlined CI/CD to deliver the MVP.

FoloBotics

01/2026 - 04/2026

Full-Stack Developer

Ontario, Canada

- Architected modular REST APIs using Java/Spring Boot to drive user authentication and warehouse routing logic, ensuring reliable data flow.
- Optimized multithreaded Java/Spring Boot services backed by PostgreSQL and Redis, reducing average API response time by 25% to improve workflow responsiveness while mitigating race conditions.

SELEST Security

09/2025 - 12/2025

Full-Stack Developer

Ontario, Canada

- Built and shipped a multi-role React Native application using TypeScript and JavaScript, Node.js/Express, MongoDB, and Google Cloud, supporting production releases to the App Store and Google Play.
- Integrated 5+ booking and shift workflows via REST APIs, supporting 200+ daily bookings and state synchronization.

Harbin Institute of Technology Robot Technology Research Institute

05/2025 - 08/2025

Industrial Vision Platform Development Intern

China

- Implemented a C++/Qt inspection application on Linux for teacup defect detection, processing up to 600 camera images/s; optimized memory management and integrated application modules.
- Exposed logs, parameter synchronization and offline frame analysis through Python/Django APIs for inspection review.

Sinopec Group

06/2024 - 12/2024

Application Intern at the Information Center

China

- Visualized 5,000+ warehouse locations in a React/Canvas/SVG dashboard used by 3 warehouse operators for live status monitoring and heatmap analysis.
- Synchronized PDA scans and AGV positions via Socket.IO with under 80 ms latency for live warehouse visibility.

TECHNICAL PROJECTS

CineFlow | Transactional Booking and Recommendations

github.com/wxw2002a/cineflow

- Implemented React/Spring Boot reservations with MySQL transactions, idempotency, Redis and FastAPI integration.
- Eliminated overselling risks and data inconsistencies during peak booking traffic by integrating a robust distributed locking mechanism.

ADDITIONAL INFORMATION

Languages: English (fluent), Chinese (native), French (basic)
